

Swiss Modular Life Science Center

Summer 2024 confirmed
for start of tenant fit-out

PULSE is a sustainable and innovative architectural concept for companies in the high-tech sector.

The building features high load capacities, high-frequency air exchange and high-voltage electricity.

The technical pre-equipment is a prerequisite for an efficient and cost-effective tenant fit-out.

Production possible on all floors

Up to 5.80 m ceiling height

Double height possible

Floor load up to 2 t/m²

Webcam

Designed for Life Sciences

Air circulation pre-dimensioned
for 10 times/hour on average

Installations for high-power electricity

Website

71,000m²

gross area

43,000m²

of fully modular floor space
above ground

450

parking
lots

12

loading
bays

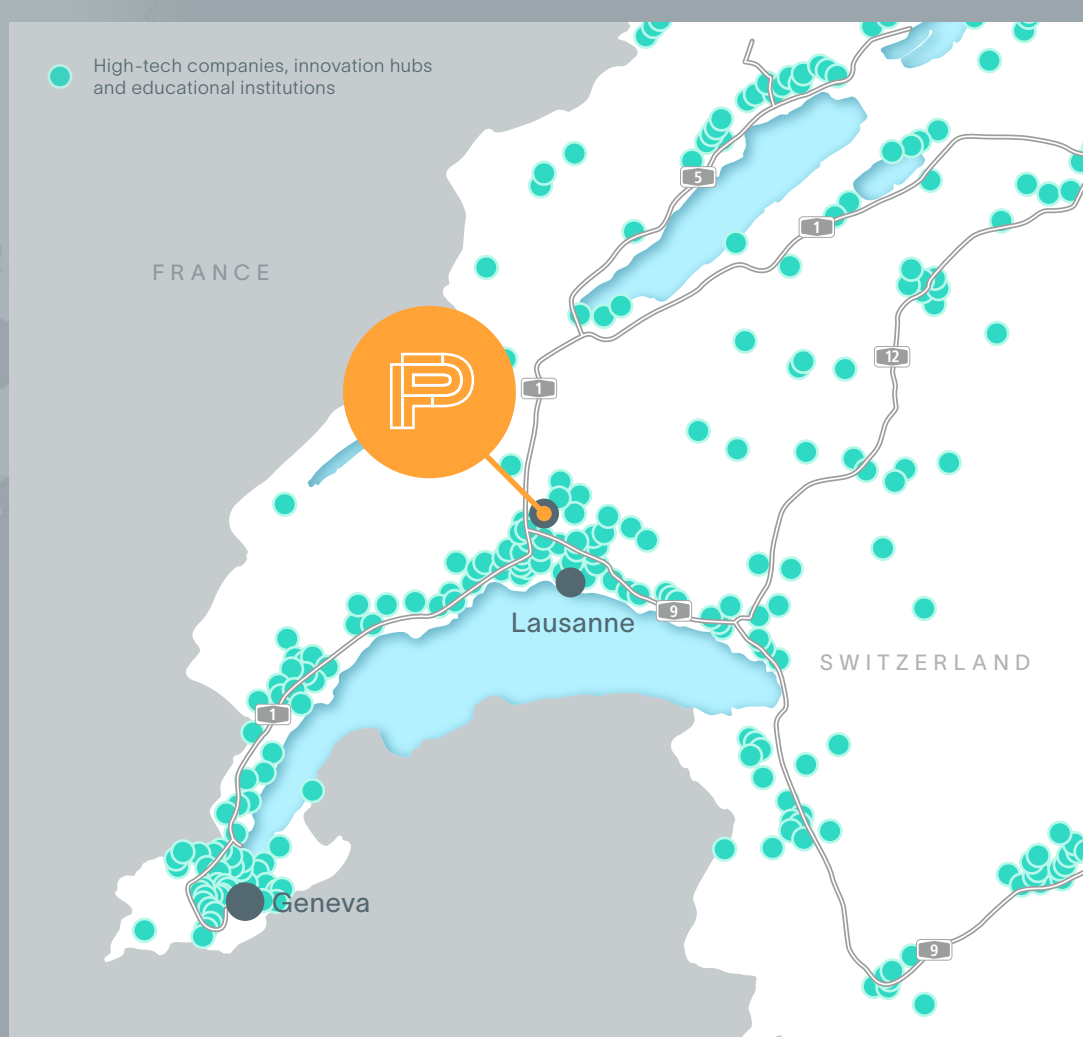

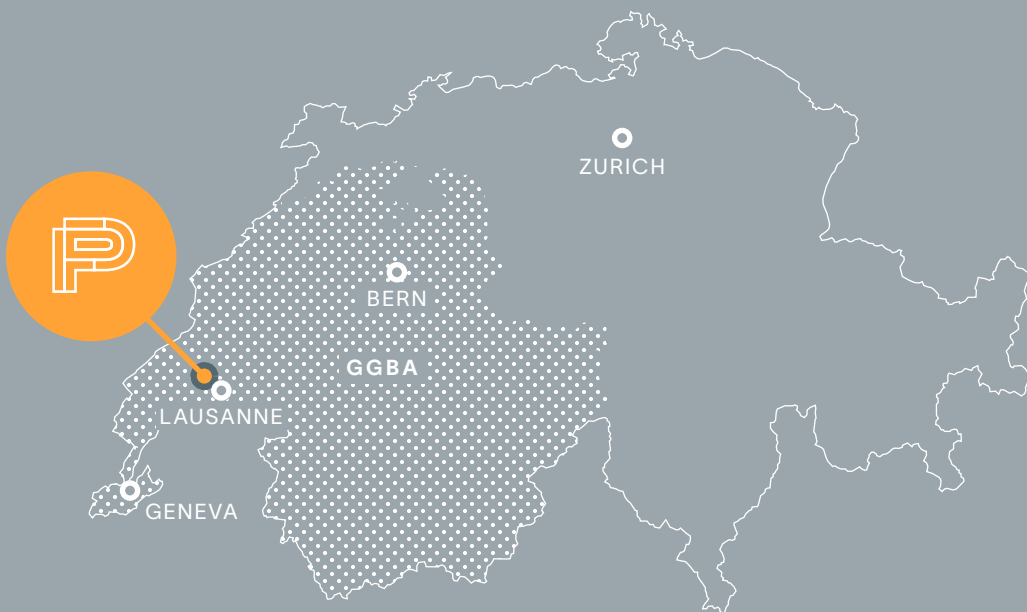

8

independent
entrances

In the Heart of the Swiss Health Valley

Located in Cheseaux-sur-Lausanne, PULSE is in the center of the Swiss «Health Valley» within the Greater Geneva Bern Area (GGBA).

This cluster consists of 1,000 biotech / medtech companies, research centers and innovation hubs totalling more than 25,000 employees*.

To Geneva airport in less than 45 minutes

Three highway exits 5 minutes away
